Portable rechargeable pumps AP2

Multiple Function

Working Voltage	7.2v	2*18650 POWER Battery
Standby current	30uA	
Standby time	2 Years	
Working current	1.6-5A	Without loading 1.6A , 40PIS loading 3.5-5A
Battery capacity	2000MAH	
Battert charging time	3hours	USB input 5V2A
USB output	Could charge Smart phone one time	5V/2A
Support Valve	Schrader valve	
LED lighting	1W LED	
Product dimension(mm)	152*60*38mm	
Product weight	340g	
Package dimension	220*120*50mm	
Maximum Pressure	100PSI	
Maximum airflow	20L/M	
Certificate	FCC · CE · ROHS PSE	

Multiple Display Units

USB Charger

The AP2 is an innovative portable air pump with built-in rechargeable battery. It features mini size, light weight, novel appearance and large screen display. At the same time, it has built-in high-precision air pressure sensor, in 5 different operation interface of setting which is convenient for people to use safely. The interactive interface includes ball type gear position, bicycle gear position, motorcycle gear position, car gear position, custom gear position (0 -100PSI). When the user adjusts to the corresponding gear position, the inflatable object can be inflated. When the air pressure reaches the system default value, the air pump will automatically stop the inflation, which is totally reliable in safety for the user who is not familiar with the air pressure setting. Also it comes with functions of power bank and bright flashlight.
